

Ceria Glass-Polishing Slurry (RTU)

Overview

Ready-to-use cerium oxide slurry designed for high-precision polishing of glass, optics, and crystals. This product is engineered to deliver scratch-free finishes and consistent results for industrial applications.

Specifications

- Pre-dispersed, stable slurry
- Controlled particle size for scratch-free finish
- Packaged in drums & bulk containers
- Industrial grade

Applications

- Optical glass polishing (lenses, watch crystals)
- Automotive glass refinishing
- Electronics and specialty glass industries

Siddhi Advantage

Siddhi Trading Company ensures reliable supply, high-grade ceria slurry quality, and packaging options that suit both industrial users and niche precision polishing applications.
