

Lanthanum Chloride Solution

Overview

Lanthanum Chloride Solution is a high-purity, specialty liquid chemical widely used in water treatment applications for pools, aquaculture, and industrial water systems. It is effective in phosphate removal, improving water clarity and maintaining optimal water quality.

Specifications

- High-concentration liquid solution for efficient treatment
- Available in industrial & aquaculture grades
- Non-DG, transportable safely in drums or IBC totes
- Stable supply chain ensuring consistent availability
- Custom concentrations available upon request

Applications

- Pool water treatment distributors for commercial and residential pools
- Aquaculture farms for phosphate control and water quality management
- Recurring bulk demand in seasonal markets such as resort pools and aquaculture production cycles
- Industrial water treatment systems requiring phosphate removal and clarity improvement

Siddhi Trading Advantage

Siddhi Trading Company provides reliable supply with flexible order quantities, ensuring small and large-scale customers receive consistent high-quality Lanthanum Chloride Solution. Custom concentrations and dedicated logistics support make it ideal for R&D, industrial, and seasonal applications.
